MASTER 2 ARCTIC STUDIES (AS)

DOMAINE(S) :
SCIENCE - TECHNOLOGIE - SANTÉ

FORMATION DIPLÔMANTE

FORMATION INITIALE

FORMATION CONTINUE

The objective of the Master is twofold: to help future decision-makers and facilitators working in the Arctic or in relation to the Arctic to develop integrated analysis tools thanks to a thorough knowledge of the fragile balance between ecosystems and the human ecology of the Arctic. In parallel, the Master is designed to give students interested in research the opportunity to develop a project that will be pursued in the form of a doctoral thesis after validation of the Master.

The full description of the master's program can be found on the Université Paris-Saclay website.
This UVSQ master's program is accredited by Université Paris-Saclay.
Students will be enrolled under "Paris-Saclay" and will receive a diploma from Université Paris-Saclay.

Conditions d'admission
