PHD STUDENT

The PhD student is a researcher in training, the doctorate allows a candidate to dedicate almost exclusively to a specialized research topic for 3 years. This is a unique, exciting and rewarding experience.

As a founding member of Université Paris-Saclay, UVSQ Doctoral Schools directly depend on Université Paris-Saclay, which now awards PhD degrees for all its member institutions.

The doctoral space is organised into 20 Doctoral Schools.

The thesis is prepared in one of the Doctoral Schools:

- in one of the research laboratories attached to it and with the agreement of the competent authorities
- under the supervision and responsibility of a thesis Director who is a Professor-Researcher or Researcher authorized to conduct research at the UVSQ.
