## POLICY ANALYSIS IN FRANCE

**Charlotte Halpern, Patrick Hassenteufel and Philippe Zittoun - Editeur : Policy Press - Collection : International Library of Policy Analysis - Janvier 2018 - ISBN : 978-1447324218 - 352 pages**

Policy analysis in France lays the foundation for a more systematic understanding of policy analysis in the country. In doing so, the volume discusses the role of the State and its restructuring, processes of government and governance, and State-Society relationships and policies as both a process and an outcome. Through 18 chapters contributions focus on policymakers, their practices, ideas and discourses, how they engage in sustained relationships with a large variety of market and society actors, and the concrete devices they use in order to make policy objectives operational. This is a comprehensive study of policy analysis in France that will be valuable to academics and postgraduate students researching and studying a range of policy and public management areas.
